

Octane Software Solutions - Services Catalog

1. DevOps Support Packages

DevOps Blue Support

- * **Pricing:** A\$4,560/month (Flat-rate base support).
- * **Features:**
 - * No distinction between support and development hours.
 - * Rollover hours (unused hours roll over to the next month).
 - * Monthly system health checks and performance optimization reports.
 - * Free unlimited access to the professional training library for power users.
- * **SLAs (Ticketing Response Times):**
 - * **Urgent:** < 1 hour (24/7 availability).
 - * **High:** < 4 hours.
 - * **Medium:** < 8 hours.
 - * **Low:** < 24 hours.

DevOps Red Support

- * **Pricing:** Advanced customized pricing tier.
- * **Target:** Larger database instances, complex integrations, or organizations with high deployment cadences requiring dedicated developer resources.

2. Advisory & Flight Check Services

TM1 Flight Check

- * **Pricing:** Fixed price of A\$5,800.
- * **Duration:** 6 days.
- * **Scope:**
 - * Comprehensive analysis of TM1 system health.
 - * RAM and hard disk space assessment.
 - * Log file rotation and feeder memory optimization checks.
 - * In-depth interviews with key developers and power users.
 - * Detailed report identifying bottleneck resolutions and upgrade readiness.

3. Integration & Connector Packages

DataFusion Connector Setup

- * **Pricing:** Fixed setup price of A\$6,950.
- * **Features:**
 - * Automates data transfer from source ERPs (such as NetSuite or SAP) directly into a central IBM Planning Analytics database.
- * **Inclusions:**
 - * Up to 5 standard report conversions.
 - * Configuring 1 instance per environment (Dev, Test, Prod).
- * **Exclusions:**
 - * Database service account creation (must be provided by client).
 - * Custom local Planning Analytics cloud exports outside standard endpoints.

4. Training Services

- * **Pricing:** Standard custom developer or power user training rate is A\$1,850/day.
- * **Scope:** Customized training plans focusing on model architecture, rule writing, TI process development, or end-user dashboard design.

5. Generative AI & Automation Packages

watsonx Orchestrate & watsonx.ai Pilot

- * **Pricing:**
 - * **Indicative SaaS Licensing:** Starting at \$160,000/year.
 - * **Implementation Services:** Starting at \$125,000.
- * **Co-Creation Proof of Concept (POC):**
 - * **Duration:** 2-to-6 weeks.
 - * **Inclusions:** Fully functional working demo integrating key company systems (e.g., TM1, Adobe, Google, GCP), active co-creation sessions, and client resource allocation plans.
